

March 15, 2012

What a great night for the Antique Radio club monthly meeting. About 78 degrees. hope this is not a sign for a very hot summer. Gene brought the meeting to order and started with the reminder about the swap meet for the OKC club, with flyer coming out on the web site. Also the Iowa club has there meet on Saturday May the 5th. Also in the web site will be a note of a non member that has some Zenith stuff for sale. Roy Cottrell has a big collection of Radios he needs to git rid of. News about this will also be in the web site, Gene will let everyone know when we can see them.

Summer Sizzler has been confirmed with the church and the money paid. Dan has re stocked the award ribbons and will pick them up next week.

TUNE UP next month at Dans house. April 28th 9:00am. Its always a fun time SO if you are having a little trouble with a radio, bring it over and have it fix while you watch.

Program was great again by Curt on how to align a radio with signal generater and volt meter.

SHOW & TELL: gene shows us his fluke counter. We were shown a Heathkit signal generater, and jerome shows us his refinised Firestone radio. Wayne had a really old (20s) McDonalds radio.

Lots of good stuff in the auction. Lots of radios went for a dollar. Those all will make donation radios if the owners see fit.

Meeting was closed with 20 in attendance.

Respectfully John Anderson HLARA Sec.
