

ASSOCIATION MONTHLY MEETING MINUTES

DATE: May,19, 2016

LOCATION: Hardesty Library (Tulsa, OK)

The meeting was called to order at 6:30 PM by Randy Beeson, President of the Association. Fourteen members (or visitors) signed the attendance roster.

GENERAL TOPICS

The HLARA Sizzler event will be on June 11, 2016. Curt is planning a large auction (tentatively in the fall) located in Collinsville.

PROGRAM

This month's program, presented by Gene Vickery. The topic was transformers and he began with a video "How Transformers Work". Transformers are energy transfer devices and date back to the late 1800's with the first commercial transformer produced by Westinghouse in 1886. Transformers have two purposes: change voltage and voltage isolation. Gene showed everyone a hand-made doorbell transformer he created in his younger years. It still works!

ITEMS OF INTEREST

Items of interest brought to this meeting included: Dave Moore's Marconi crystal set (model 106 D from early 1920's) which was primarily used aboard ships.

AUCTION

Several items were sold at auction. The list included over ten radios, speakers, plus various other items. Total proceeds were \$122.00.

The next association meeting is scheduled for August 18 at 6:30 PM. The meeting ended at approximately 8:30 PM.
