

The meeting was called to order at 6:30 PM by Earl Stutzman. Gene Vickery moved that the minutes for the meeting 1/21/21 be approved as posted on the HLARA website. Motion carried. There was no meeting or minutes in February because of hazardous weather conditions.

Earl Massoth gave the treasurer's report. We have money in the bank and no outstanding debts.

Old business: None

New business: Earl Stutzman will check with Asbury to see if there is a Saturday in June that we could reserve for the Summer Sizzler.

Five short presentations were offered:

Earl Stutzman - How to build a screw-base light bulb using an old screw base and a common bayonet bulb.

Earl Massoth - Refurbishing a Hallicrafters S-120. The missing Glowbar was replaced with a resistor and a thermistor.

Gene Vickery - How to repair an IF transformer with the dreaded silver migration disease. Information and photos taken from article at Radio Museum by Paul Pinyot, 2013.

Scott Petty - How to use the NJ7P website to copy and paste tube base diagrams into a Word document. A great aid when repairing a radio.

Gene Vickery - How to use an SCR to obtain the correct filament voltage without using a resistive line cord or large power resistor.

Show and Tell: Nothing this month.

Door Prize winner: Mark Gabby, Early Westinghouse 1-tube radio

Auction: Color TV alignment generator, Tubes, Airline clock radio, GE 7-tube radio restored by Bob Shindhelm (no case or speaker), 3 Bose speakers, Early GE receiver and detector amp (AA-1400A) with headset, Soundcraft LX7-32 audio mixer.

Attendance: Jared Chapa, Mark Gabby, Adrian Gilstrap, Joe Kleiner, Eldon Loomis, Earl Massoth, Mary Murray, Walt Murray, Scott Petty, Daniel Presley, Monty Smith, Earl Stutzman, Gene Vickery
